Vette Corp Unveils Coolant Distribution Unit for Data Center Liquid Cooling at AFCOM Data Center World Conference

CDU ENABLES INTELLIGENT CONTROL FOR LIQUID COOLING OF UP TO TEN EQUIPMENT RACKS

Manchester, New Hampshire (USA) April 1, 2008 – Vette Corp (Vette), a leading global provider of thermal management solutions, introduced a series of LiquiCool™ Coolant Distribution Units (CDUs) for its family of data center cooling solutions at the Association For Computer Operations Management’s (AFCOM) Data Center World conference in Las Vegas, Nevada. Data center professionals from around the world are meeting at Data Center World to address key industry issues including data center greening, thermal management, energy use optimization and carbon footprint reduction.

The CDU supports a number of critical functions for liquid cooled rack-mounted equipment. In a liquid-cooled system, the building chilled-water supply should not be a direct source of cooling for the IT racks. Instead, a CDU should be deployed to create an isolated secondary cooling loop that is separated from the building primary chilled water supply. The secondary cooling loop is easily controlled to stay above the room dew-point, preventing condensation. The CDU secondary cooling loop also contains just a few gallons of water, thereby reducing exposure within the whitespace by an order of magnitude over conventional liquid cooling solutions.

According to Vette Corp Datacom Facilities Manager Joe Capes, “Liquid cooling solutions can dramatically reduce data center cooling energy costs and improve floor space utilization. Vette’s Coolant Distribution Units are an important component of our LiquiCool data center cooling solutions and provide intelligent management control for up to ten racks of equipment,” Capes concluded. Vette Corp is displaying a LiquiCool Coolant Distribution Unit at booth #661 within the exhibition area at the Las Vegas Convention Center on April 1-2, 2008.

LiquiCool Coolant Distribution Unit Features

Vette's LiquiCool CDUs are available in rack-mounted or free-standing configurations and come with a one year parts and labor warranty.

Additional LiquiCool CDU features include:

- Redundant pumps and valves
- Dew point tracking for maximum performance
- Auto fill & bleed of secondary loop
- Remote monitoring
- Plug & go manifold with leak free couplings

Pricing & Availability

The LiquiCool Coolant Distribution Unit is available now as part of liquid cooled solutions for rack-mounted equipment from Vette Corp's Datacom Facilities Division. For configuration information and pricing on Vette Corp's LiquiCool solutions, contact Vette at 1-877-24-VETTE (1-877-248-3883), or visit www.vettecorp.com for more information.

About Vette Corp

Founded in 2004, Vette Corp is a global thermal management solutions provider specializing in solving thermal challenges for leading OEM's, operators and owners of computer, communications and industrial electronic equipment. Vette maintains a growing IP portfolio, with design and applications engineering in Asia and North America. The company operates high-volume manufacturing facilities in both continents.

Vette Corp offers an extensive solutions portfolio, as well as design and manufacturing capabilities that are complemented by a world-class supply chain and customer service dedicated to offering clients the most efficient and highest quality end-to-end solutions available for today's complex thermal problems. The corporation is privately held and is headquartered in Manchester, New Hampshire, USA. Additional information about Vette Corp can be found at www.vettecorp.com.

LiquiCool is a trademark of Vette Corp.
