Vette Corp Expands Rear Door Heat Exchanger Offering for Data Center Liquid Cooling

BEST-IN-CLASS COOLING SOLUTION NOW AVAILABLE FOR LEADING BRANDS OF EQUIPMENT RACKS

Portsmouth, NH July 17, 2008 – Vette Corp (Vette), a leading global provider of thermal management solutions, announces an expanded liquid cooling product line for high density server, storage and communications equipment. Vette’s family of LiquiCool™ products now include Rear Door Heat Exchangers that are compatible with most leading brands of IT racks. Vette’s LiquiCool™ Rear Door Heat Exchanger replaces the rear door of a new or existing equipment rack and uses advanced liquid cooling technology to remove warm exhaust air before it enters the facility whitespace. The Rear Door Heat Exchanger earned the distinction as the most energy efficient data center cooling system during a recent head-to-head competition sponsored by the Silicon Valley Leadership Group. Vette’s LiquiCool Rear Door Heat Exchanger achieves industry-leading energy efficiency by eliminating moving parts and fans — a critically important factor given the power density of today’s data centers and the ever increasing cost of energy. Vette’s unique passive cooling solution can reduce energy costs by 50 percent or more.

According to Vette Corp Datacom Facilities General Manager Joe Capes, “Our LiquiCool Rear Door Heat Exchanger addresses the most pressing concerns of data center managers – reliability, flexibility, space utilization, lowering total cost of ownership and data center greening.

“We based our unique design on more than 30 years of liquid cooling know-how. The Rear Door Heat Exchanger attaches quickly and easily to the rear of most industry leading racks, making it ideal for both retrofit and new build applications,” Capes concluded.

Vette’s LiquiCool Rear Door Heat Exchangers are available now for the leading brands of equipment racks. For configuration and pricing information about Vette Corp’s LiquiCool solutions, contact Vette at 1-877-24-VETTE (1-877-248-3883), or visit www.vettecorp.com.

About Vette Corp

Founded in 2004, Vette Corp is a global thermal management solutions provider specializing in solving thermal challenges for leading OEM’s, operators and owners of computer, communications and industrial electronic equipment. Vette maintains a growing IP portfolio, with design and

applications engineering in Asia and North America. The company operates high-volume manufacturing facilities on both continents.

Vette Corp offers an extensive solutions portfolio, as well as design and manufacturing capabilities that are complemented by a world-class supply chain and customer service dedicated to offering clients the most efficient and highest quality end-to-end solutions available for today's complex thermal problems. The corporation is privately held and is headquartered in Portsmouth, New Hampshire, USA. For additional information about Vette Corp, please visit www.vettecorp.com.
